

## Corrigendum to “Equilibrium olivine-melt Mg isotopic fractionation explains high $\delta^{26}\text{Mg}$ values in arc lavas” by Liu *et al.*, 2022

X.-N. Liu<sup>1\*</sup>, R.C. Hin<sup>1</sup>, C.D. Coath<sup>1</sup>, M. van Soest<sup>2</sup>, E. Melekhova<sup>3</sup>, T. Elliott<sup>1</sup>

### Corrigendum

<https://doi.org/10.7185/geochemlet.2226cor>

Received 8 August 2022 | Accepted 11 August 2022 | Published 24 August 2022

**Correction to:** *Geochemical Perspectives Letters* 22, 42–47, doi: [10.7185/geochemlet.2226](https://doi.org/10.7185/geochemlet.2226), published 19 July 2022.

In Figure S-6 in the Supplementary Information, the  $\delta^{26}\text{Mg}$  value of BHVO-2 was mislabelled as the  $\delta^{25}\text{Mg}$  value of BHVO-2 ( $-0.103 \pm 0.014$  ‰, 2 s.d.). The rest of the information in Figure S-6 is correct, including the figure caption. The correct text should be “BHVO-2:  $-0.202 \pm 0.027$  ‰ (2 s.d.)”. The figure has now been corrected in the Supplementary Information, and the corrected figure is shown below.

**Cite this as:** Liu, X.-N., Hin, R.C., Coath, C.D., van Soest, M., Melekhova, E., Elliott, T. (2022) Corrigendum to “Equilibrium olivine-melt Mg isotopic fractionation explains high  $\delta^{26}\text{Mg}$  values in arc lavas” by Liu *et al.*, 2022. *Geochem. Persp. Let.* 23, 5–5. <https://doi.org/10.7185/geochemlet.2226cor>

**Figure S-6** Long-term variations in the magnesium isotope composition of rock standard BHVO-2, indicating a reproducibility of 0.027 ‰ (2 s.d.).
